

Right Assist Inc.

Dispatch and CRM System

Your Complete Business

At One Place

IOS/Android, Desktop/Web-based application system

Integration of the mobile version of the system, that allows to use both scheduling/dispatching and live tracking.

**Manage your business
from anywhere**

CRM System

- Get a 360-degree view of each customer
- CRM solution helps you focus on your organization's relationships with individual people, including customers, service users, colleagues, or suppliers — throughout your lifecycle with them, including finding new customers, winning their business, and providing support and additional services throughout the relationship.

Total Control

The Right Assist is an automated dispatching management system that gives you complete control of your daily operation. Smart system, controls every transportation process by tracking locations and statuses with live GPS and interactive maps, giving you complete control of your dispatching operation.

Automated Billing

Keep track of invoices, payments, and costs, and compare budget scenarios to actual revenue, costs or profit automated bases.

Analytic Real-Time Reporting

- Understand every aspect of both time and money
- Analyze processes, monitor risks, and create high-level reports in a single click
- No more delays and waiting for data to refresh – all reports and dashboards are displayed in real time.

Main Features

1. Automated Trip Entry

17. Scheduled/Selected Vehicle Inspection

18. Driver Vehicle Operating Scoring

19. Vehicle Maintenance Expense & Fuel Budget Reporting

20. Professionally Developed API system

21. Offline Operation

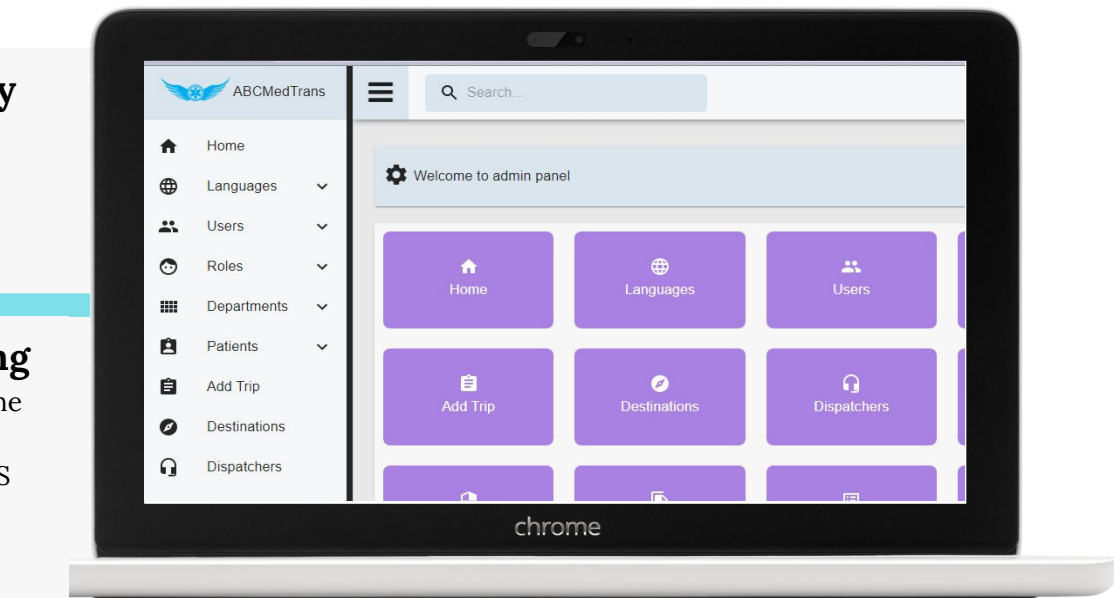

Automated Trip Entry

System automatically uploads manifest every 10 minutes or chosen time and detects the changes with alerting system.

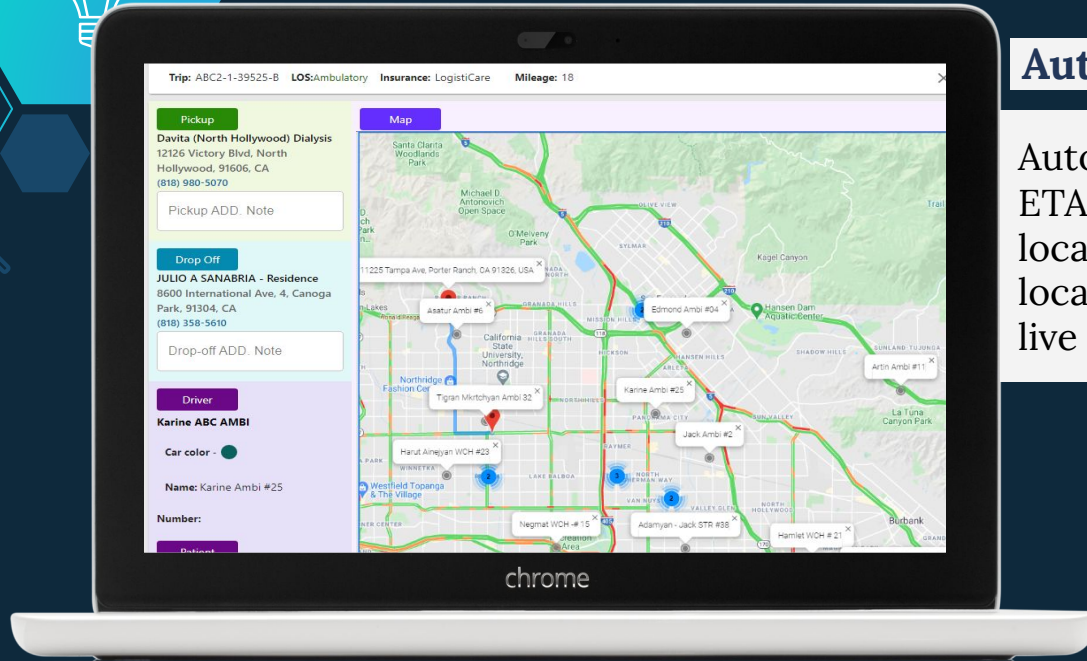

Automated Scheduling

System makes schedules for the drivers based on pickup time, vehicle type, trip distance, LOS etc.

Automated ETA System

Automated ETA will provide the ETA from the driver's current location to the pickup/drop off location based on Google Maps live traffic.

The image shows a mobile application interface on a smartphone screen. The background of the app is white. At the top, there is a navigation bar with a back arrow, a date filter '19/04/2014', a calendar icon, a checkmark icon, and a search bar labeled 'Search...'. Below the navigation bar, there is a section titled 'Statuses' with a dropdown menu. The main content area displays a table with the following columns: 'Statuses', 'Leg ID', 'PT', and 'Pickup'. The table contains several rows of data, each with a colored circle icon representing the status.

Statuses	Leg ID	PT	Pickup
Complete	SC01-156409-B	\$ 48.72	FACILITY 26357 Mission Play, Santa Clara
No show	ABC2-1-39525		JULIO A. SANCHEZ - RESIDENC 8000 International Ave., A, Carago
Cancelled	ABC2-1-39525		DAWITA (NORTH HOLLYWOOD) 12121 Victory Blvd, North Holly
Pickup location	ABC2-1-39076 WCH	\$ 34.58	AVRUMAM WEISS - PANORAMA C 14857 Roscoe Blvd, Panorama C
Ready for	ABC2-1-39076 WCH	\$ 34.58	FRESNENY MEDICAL CARE 823 S Central Ave, Glendale, 9123

[illegible]

System automatically suggests nearby vehicles with the fastest ETAs based on time, mileage, vehicle type, etc.
(Will calls/same day orders)
