Right Assist Website and Marketplace BluePrint

1. Website landing page
2. Login/Registration for 2 types of contractors (Transportation Companies and Private trips submission companies)
3. The online submission form for the trip booking (Online ordering system for users)
4. A marketplace that is available for the transportation companies
5. Every company can accept thrips or reroute in the last 24 hours
6. Dispatch can assign or unassign trips manually from the transportation companies
7. The company that submitted the trip can track the trip on the map (can see who's the driver car, and what's the ETA)
8. Users can see his/her all trip history and can make changes to the upcoming trips
9. The system indicates all the vehicles available from the transportation companies
10. Users can create a standing order and have a preferred company (or blacklist of transportation companies)
11. Online payment
12. Every user will have a rate sheet, and while they will book the trip system will calculate the trip's total cost.
13. Users can rate the transportation companies
14. System first will offer trips to the companies who's rate is higher.
